Adrian Traian Pleșca, Gabriel Chiriac,
Vadim Cazac, Marcel Burduniuc

Joint Operational Programme Romania-Republic of Moldova 2014-2020

Costică Nițucă, Ilie Nucă,
Adrian Traian Pleșca, Gabriel Chiriac,
Vadim Cazac, Marcel Burduniuc

Improving the cross-border public transportation using electric buses supplied with renewable energy

Contract number 2SOFT/3.1/54

www.ro-md.net/

This project is funded by the European Union

Romania-Republic of Moldova
ENI-CROSS BORDER COOPERATION

A project implemented by
„Gheorghe Asachi” Technical University of Iasi, Romania and
Technical University of Moldova, Chisinau, Republic of Moldova

ISBN 978-606-749-584-3

CONTENTS

FORWARD.....	12
Project data.....	14
Outputs and results.....	16
Project results.....	20
Programme outputs according to the description in the project proposal.....	25
PART 1 - ANALISYS OF THE ELECTRIC BUSES.....	29
Chapter 1 - THEORETICAL ASPECTS.....	29
1.1 The benefits of using of the electric power supply instead of traditional fuels and the impact on the environment.....	29
1.2 Perspectives for fully electric buses in the EU.....	33
1.3 Technical limitations of using the electric buses.....	37
1.4 Electric buses types to use in urban and interurban transportation.....	38
1.5 Electric buses technology configurations.....	41
1.6 The drive system and the optimization of the electric buses operating.....	46

This project is funded by
the European Union

Romania-Republic of Moldova
ENI-CROSS BORDER COOPERATION

1.7 Electric motors used to drive the electric buses.....	49
1.8 The auxiliary equipment used on the electric buses	51
1.9 Adapted trolleybuses as electric buses used in Chisinau urban transportation	54
References on Chapter 1	65
Chapter 2 - ELECTRIC BUS TEST BENCH.....	67
2.1 Description of the test bench for the electric bus	67
2.2 Experimental data on the test bench: description and analysis.....	71
References on Chapter 2	85
PART II – ANALISYS OF THE AUXILIARY LOADS.....	86
Chapter 3 - AUXILIARY LOADS ON ELECTRIC BUSES	86
3.1 General aspects on auxiliary loads	86
3.2 Auxiliary loads on electric buses.....	91
3.2.1. Heating, ventilation and air-conditioning (HVAC) system for an electric bus.....	91
3.2.2. Lighting	95
3.2.3. Audio system.....	97
3.2.4. Windows cleaning system and seat heating.....	97
3.2.5. Other systems	97
3.3 Comfort of the passengers and the auxiliary energy demand.....	97
Chapter 4 - ENERGY MODEL FOR AN ELECTRIC BUS	100
4.1 Model description	100

This project is funded by
the European Union

Romania-Republic of Moldova
ENI-CROSS BORDER COOPERATION

4.2 Fundamentals aspects of electric car energy consumption.....	102
4.3 Overall energy consumption of auxiliary systems	105
References on Part II	109
PART III - THERMAL MODEL OF THE INDOOR ENVIRONMENT OF THE ELECTRIC BUS	111
Chapter 5 - THERMAL MODEL INSIDE THE BUS ENVIRONMENT.....	111
5.1 Heat transfer theory.....	111
Heat conduction	111
Heat convection	113
Heat Radiation	114
5.2 Heat Balance Method for the electric buses.....	115
Chapter 6 - GEOMETRY OF THE ELECTRIC BUS USED FOR THE THERMAL MODEL	121
Chapter 7 - MODELING AND PHYSICS OF THE INSIDE THERMAL ENVIRONMENT OF THE ELECTRIC BUS	130
7.1.Meshing.....	130
7.2.Materials used for the electric bus model.....	132
7.3.Physics for the electric bus model	137
Chapter 8 - THERMAL MAP AND THE SIMULATIONS OF THE INDOOR SPACE OF THE ELECTRIC BUS	138
8.1.Simulations	138
8.2.Thermal map and outline the hotspots.....	142

This project is funded by
the European Union

Romania-Republic of Moldova
ENI-CROSS BORDER COOPERATION

8.3.Comparison between the simulations results and the measured data	144
8.4.Thermal map of the air conditioning system.....	145
References on Part III.....	148
PART IV - RENEWABLE ENERGY FOR THE BATTERIES	150
CHAPTER 9 – PHOTOVOLTAIC PANELS.....	150
9.1.Fundamentals on the photovoltaic panels.....	150
9.2.Ideal PV Cell.....	151
9.3.Modeling the PV Module.....	153
9.4.Numerical modelling and simulations of a real photovoltaic module	157
9.5.Experimental data for the PV module.....	160
References on Chapter 9	163
Chapter 10 - BATTERIES PARAMETERS FOR THE ELECTRIC BUSES 166	
10.1. Fundamentals of electric batteries	166
10.2. Important practical parameters of the batteries .	171
References on Chapter 10	182
CHAPTER 11 – HYBRID CHARGING SYSTEM DESIGN FOR ELECTRIC BUSES WITH AUTHONOMUS POWER SOURCE .	183
11.1. Introduction	183
11.2. The charging station construction	187
11.3. Photovoltaic plant design charging station	189

This project is funded by
the European Union

Romania-Republic of Moldova
ENI-CROSS BORDER COOPERATION

11.4. Integration of the photovoltaic plant with the charging station	192
11.5. Modeling of the charging station of the trolleybus with autonomous drive integrated with a photovoltaic park	194
11.6. Analysis of modeling results.....	195
References on chapter 11	200
ANNEXES	201
Annexe 1 - Technical features of electric bus e321 used for the project researches.....	201
Annexe 2 - S7-1200 Programmable controller	205
Annexe 3. Electrical schemes for the control system of the experimental test bench.....	210
REFERENCES.....	215
